

Define your problem statement

Now a day's people are suffering from skin diseases, More than 125 million people suffering from Psoriasis also skin cancer rate is rapidly increasing over the last few decades especially Melanoma is most diversifying skin cancer. If skin diseases are not treated at an earlier stage, then it may lead to complications in the body including spreading of the infection from one individual to the other. The skin diseases can be prevented by investigating the infected region at an early stage. To overcome the above problem we are building a model which is used for the prevention and early detection of skin cancer, psoriasis

5 minutes

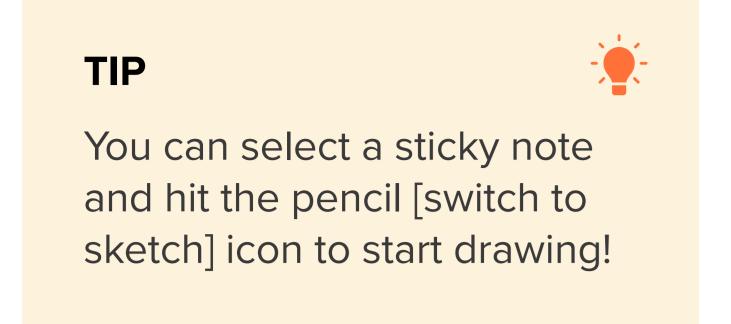

Brainstorm

Write down any ideas that come to mind that address your problem statement.

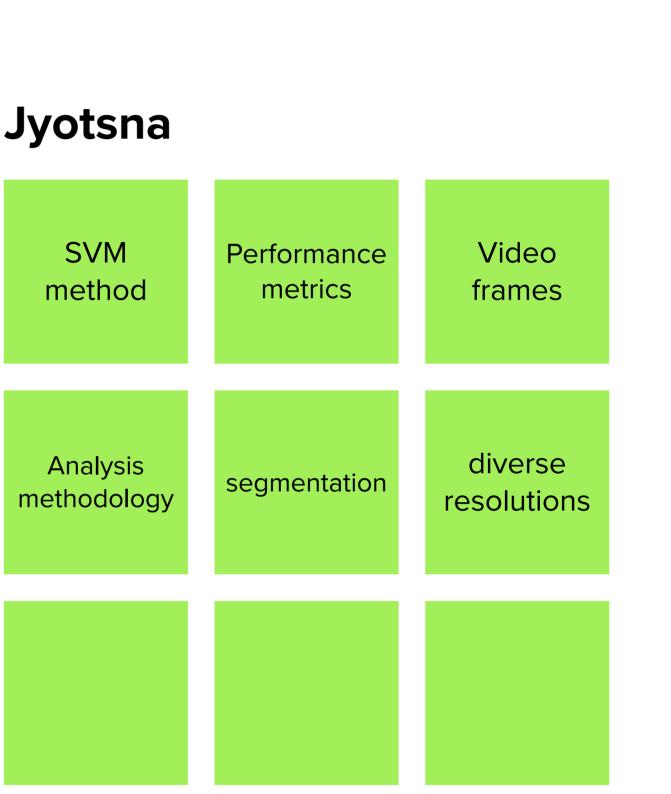

① 10 minutes

Vishal D

Hari Krisl Dermnet dataset	hna Moort	segmentation maps
Trigger Emergency	normalization	testing sets

Gajendar Singh J			
K-means clustering	Accuracy rate	dermatoscopic datasets	
DB	decomposition	lighting	

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

① 20 minutes

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.
